Warranty & Support

Amazon.com Return Policy: You may return any new computer purchased from Amazon.com that is "dead on arrival," arrives in damaged condition, or is still in unopened boxes, for a full refund within 30 days of purchase. Amazon.com reserves the right to test "dead on arrival" returns and impose a customer fee equal to 15 percent of the product sales price if the customer misrepresents the condition of the product. Any returned computer that is damaged through customer misuse, is missing parts, or is in unsellable condition due to customer tampering will result in the customer being charged a higher restocking fee based on the condition of the product. Amazon.com will not accept returns of any desktop or notebook computer more than 30 days after you receive the shipment. New, used, and refurbished products purchased from Marketplace vendors are subject to the returns policy of the individual vendor.

**Ryzen 7, Solid choice multipurpose laptop**

Reviewed in the United States on July 3, 2023

**Verified Purchase**

I have had this laptop for one year as of this month, so it is not the bleeding edge of technology. That said, I have been very satisfied with my purchase. I am in grad school, I do a lot of writing, and I think the build quality and the keyboard is great. I have never once hit the off key accidentally or had any trouble with the back-lit keyboard on the light colored keyboard. I mention those because I remember them as issues in another review. My PC is not working right now and I have been doing some gaming when I have time, and I would advise a cooling fan that sits under the laptop and raises it up to add to circulation or it will get hot. I think that is a general issue with laptops unless maybe they have some built in specialized cooling mechanisms, and even those may have to have the extra cooling. The only con I have for this laptop is that it only has 2 USB 3 ports and I wish it had 1 more, it has a micro USB so it can be charged that way with a string enough charger (the one that fast charges my s23U works great) and it does charge fairly quickly and holds the charge well for daily use. It will need to be plugged in for gaming and I use the charger that it came with for that. Speakers seem ok, for YouTube, good enough. Gaming I definitely use a headset. Screen is only a 60ghz refresh rate, it still looks fine to me, I think the 300 nits brightness and color balance are good. I have

**Great Mid-High End Portable Laptop for Software Development and Light-Midweight**

**Gaming**

Reviewed in the United States on July 22, 2021

**Verified Purchase**

Note: Minor review edits after ~2 months w/ laptop

This is a very powerful laptop that doesn't have the drawbacks of many gaming laptops. It looks normal, has a charging brick of 90W which is actually portable, and is nice and lightweight. Main distinguishing factors are:

- really nice display (100% srgb 1080p 60hz max 300 nits w/ good brightness scaling)
- good build quality overall, with the lid being a tiny bit wobbly
- the top-notch performance for an 14" ultra-thin (see details below if interested)
- really small size
- thermals are decent, especially for what it is, though fan gets very loud under heavy loads

The screen and keyboard are both pretty nice (keyboard backlight is a nice plus) and webcam is fine (720p). Port selection includes 2 USB 3.0, 1 USB C, 1 HDMI, Combined Audio, and a Kensington Lock. It's a bit annoying that there's no ethernet or SD card reader; however, the I got a tp-link ethernet + usb hub for ~\$30

Cesar

**Very good for the price, with some compromises...**

Reviewed in the United States on October 24, 2021

**Verified Purchase**

I bought this laptop with the intention of using it for school and for some light gaming. I wanted something thin, small, light, with good battery life. I didn't expect to pay such a low price for an item matching my requirements. This is a great laptop but it's got things that one should know about before buying.

Speakers: They are bad, not decent, outright bad. There is little sound clarity and they are very quiet. If the sound is important, I recommend looking somewhere else.

Bloatware: Too much, it's difficult to get rid of and it will try to sneak its way back in. At least it stays hidden and doesn't pop up. Be warned, this laptop comes with one of those annoying anti-viruses. It took little effort to get rid of it and it never came back.

Screen: Looks nice, a lot better than a budget laptop. But, this isn't a Surface, Macbook, or XPS. Do not expect an amazing screen. Expect a good screen, it's pretty bright as well.

**Great battery life**

Reviewed in Canada on February 6, 2023

**Verified Purchase**

I like that it lasts all do with moderate load but can handle somewhat heavier loads when needed. I do a lot of photo editing which it handles well. It can do simple editing of 4k video when I need it to.

Report

Dennis Lim

**Great specs and value**

Reviewed in Singapore on November 18, 2022

**Verified Purchase**

Very good specs in a portable package of 1.4kg. However, 1 glaring flaw is the uneven keyboard backlight. In addition, with the backlight on during daytime makes the keyboard characters almost unreadable. Silver keys and a white backlight is a bad combination. I have a hp laptop with black keys and I do not face this readability issue.

Zander Teo

**best laptop for work and lightweight gaming**

Reviewed in Singapore on November 11, 2021

**Verified Purchase**

cant believe this is only priced at \$1.4K SGD, such a steal. i use this for my work, school and for gaming and performance is amazing. have yet to try video rendering and content creation performance. for a lightweight

## Report

**Good stuff. You won't find pc with the same specs at this price at just 1.4kg.**

**Verified Purchase**

Only gripe here is that keyboard and chassis gets incredibly hot when attempting to play mainstream games (halo, bf, dota etc). Granted this was touted as a video editing and design laptop, and not so much a gaming laptop, despite the damn impressive gaming specs.

Otherwise 5/5. Would recommend.

## Report

**Es genial!**

**Verified Purchase**

Estoy satisfecho.

### About this item

## Product details

Acer Swift X SFX14-41G - 14" - Ryzen 7 5800U - 16 GB RAM - 512 GB SSD - US Intl

### Key Features and Benefits:

- **Powerful performance**  
With an advanced processor and graphics, you're able to finish tasks faster with plenty of power to spare for creation-focused work or even the occasional game. Multiple cooling modes, dual heat pipes and a device-lifting hinge, all combine to further enhance the laptop's performance.
- **Light, modern design**  
Go where you want, when you want. This laptop stays with you throughout your daily adventures.
- **Clearer, brighter vision**  
Eye-popping colors and details bring images and videos to life in the 72% NTSC color gamut. Through the use of narrow bezel, offering an amazing screen-to-body ratio, users see more of the screen. Eye strain is also lessened and colors are improved with Acer ExaColor and Acer Color Intelligence.
- **All-day use**  
Spending all-day on the move requires a large battery, and it's capable of lasting for longer. In cases of emergency, it can also be fast-charged.
- **Full connectivity**  
Quickly connect to wireless networks with the dual-band Intel Wi-Fi 6 and Bluetooth. In addition, take full advantage of the plentiful array of ports for fast data transfer and power delivery.

### What's Included:

- Acer Swift X SFX14-41G
- Power adapter
